

SmartSelect Guide

A rules-based credit screening workflow tool for mortgage lenders.

Last Updated: June 2026 • Version 1.0

What Is SmartSelect?

SmartSelect is a rules-based workflow tool that helps lenders screen applicants earlier in the credit review process using lender-selected criteria.

SmartSelect may help lenders avoid moving every applicant directly into a full credit report workflow before applying lender-selected criteria. It routes applicants based on filters that the lender configures — such as score thresholds or other qualifying criteria.

■ SmartSelect Does Not Approve or Deny Borrowers

SmartSelect is a workflow tool. It supports the lender's review process but does not make credit decisions, underwriting decisions, or loan approvals. The lender remains responsible for all credit decisions, underwriting decisions, and final loan approval.

SmartSelect results should not be treated as a credit approval, denial, or underwriting decision.

Why SmartSelect Is Helpful

SmartSelect may help lenders create a more efficient credit review process by applying preset lender-selected rules before a full credit report is ordered. Instead of moving every applicant directly into a full credit report workflow, SmartSelect allows lenders to apply their own criteria first.

How It Works

- 1 The lender selects the criteria they want to apply — for example, a minimum credit score threshold.
- 2 The applicant's credit profile is reviewed against those criteria.
- 3 If the applicant meets the requirements, SmartSelect may allow the workflow to continue — pulling the remaining credit information and keeping the process moving.
- 4 If the applicant does not meet the requirements, the lender may choose not to proceed with a full credit report at that time.

Important Limitations

■ SmartSelect Does Not Guarantee Approval or Loan Eligibility

SmartSelect is designed to make the credit review process more efficient, but it does not guarantee loan approval, borrower eligibility, or final underwriting results. Results depend on lender-configured criteria, investor guidelines, AUS requirements, and applicable law.

■ LOS Orders Only

SmartSelect can only be used through LOS (Loan Origination System) orders. It is not available as a direct pull through MeridianLink.

Need help understanding or setting up SmartSelect criteria? Contact ISC Credit at (800) 290-2801 and our team can help review the workflow.

This guide is for general workflow education only. Requirements may vary by lender, investor, AUS, credit bureau, account setup, and applicable law. ISC Credit does not make underwriting or credit approval decisions. Clients should follow their own company policies, investor guidelines, and compliance requirements.
